

# Emil Kovačević

Web Developer

## About me

I am a web developer with a strong focus on JavaScript and its frameworks. I recently transitioned from a sales career to the IT industry, and have been working in web development since September 2022. I enjoy learning and experimenting with modern tools and technologies in the field. I have completed an IT bootcamp, specifically the Scrimba online bootcamp and I have showcase projects on my developer portfolio website that demonstrate my experience with React and Next.js. My career goal is to continue building interactive web applications and grow my experience and knowledge. Please check my portfolio pages for more information about me.
